

Conclusion: # Data Overview and Cleaning

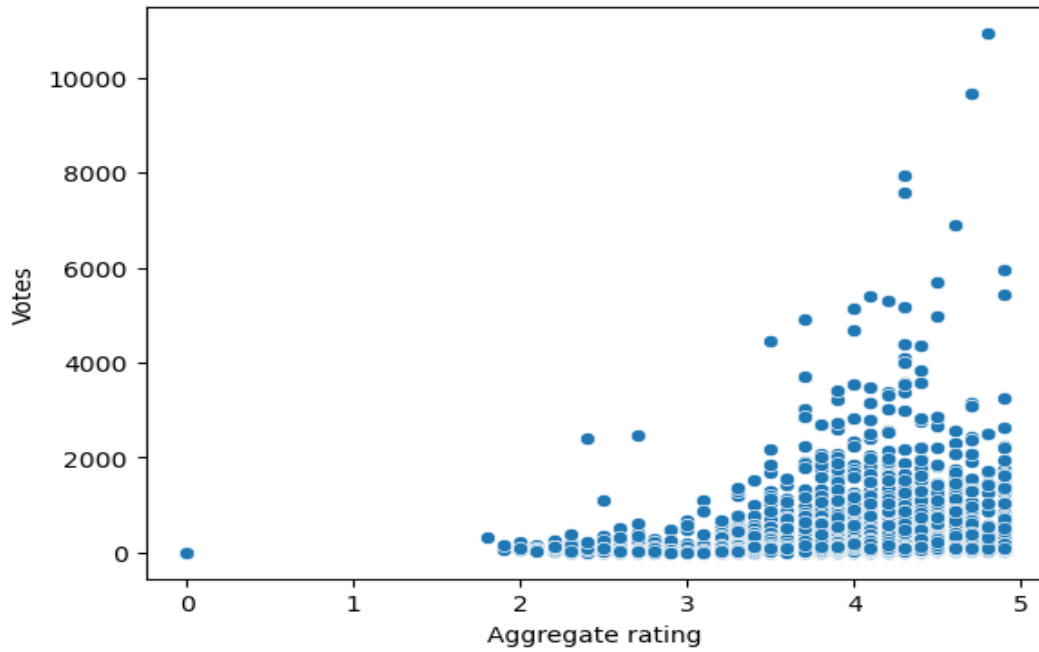

Conclusion: Install libraries

Conclusion: # Univariate Analysis

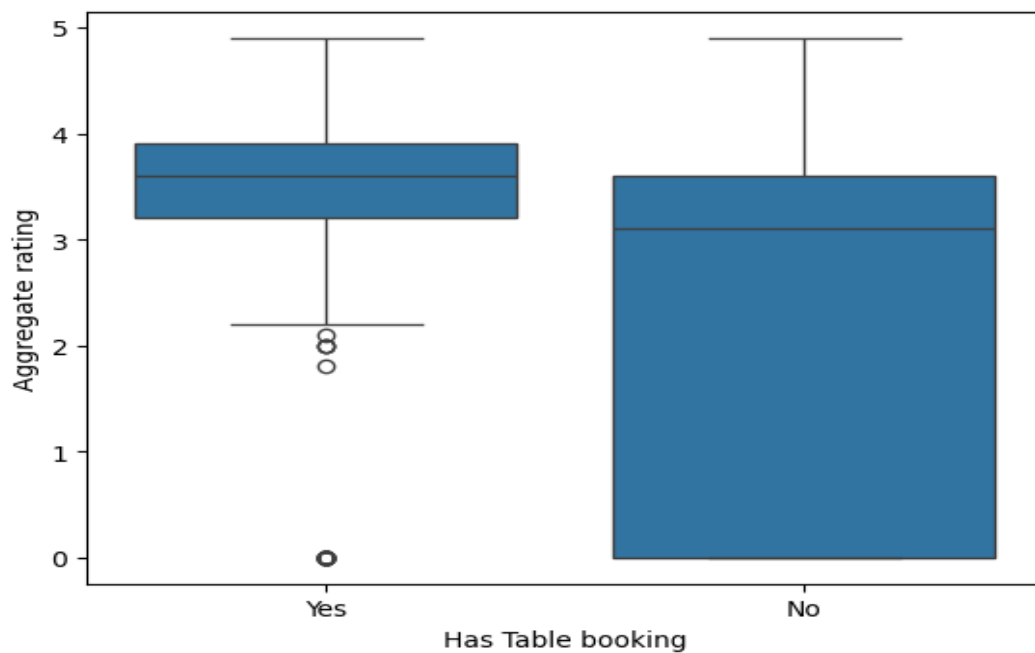

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

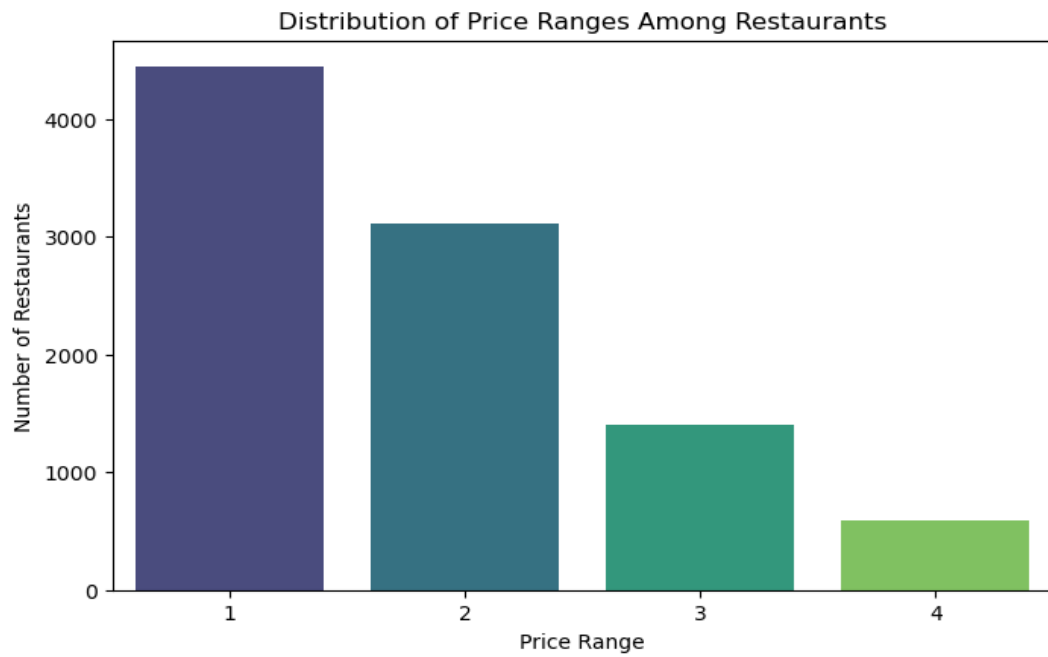

Conclusion: # Bivariate Analysis

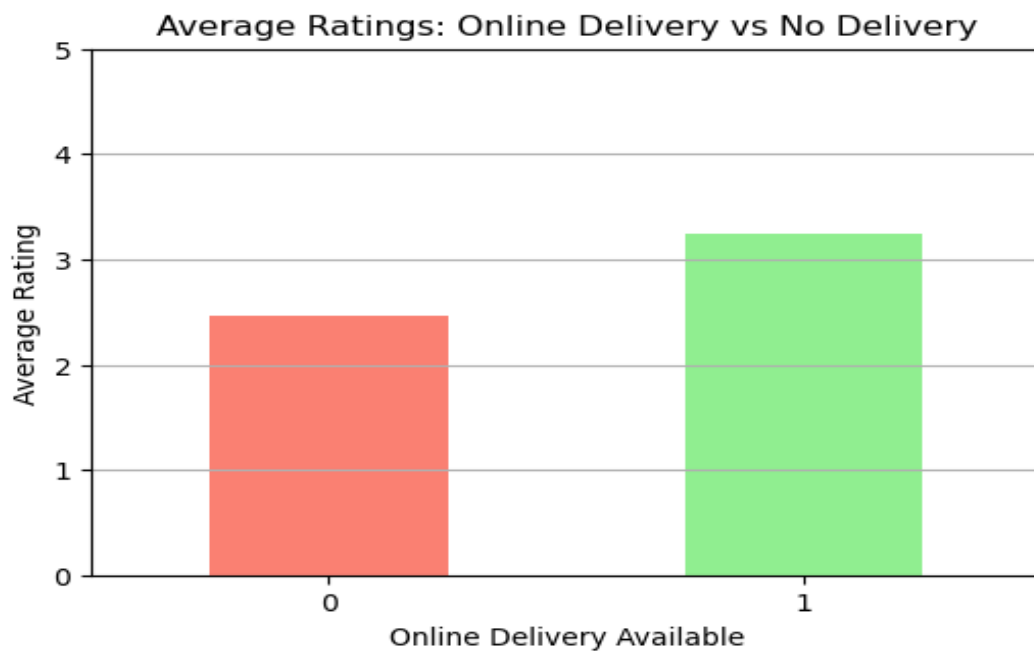

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

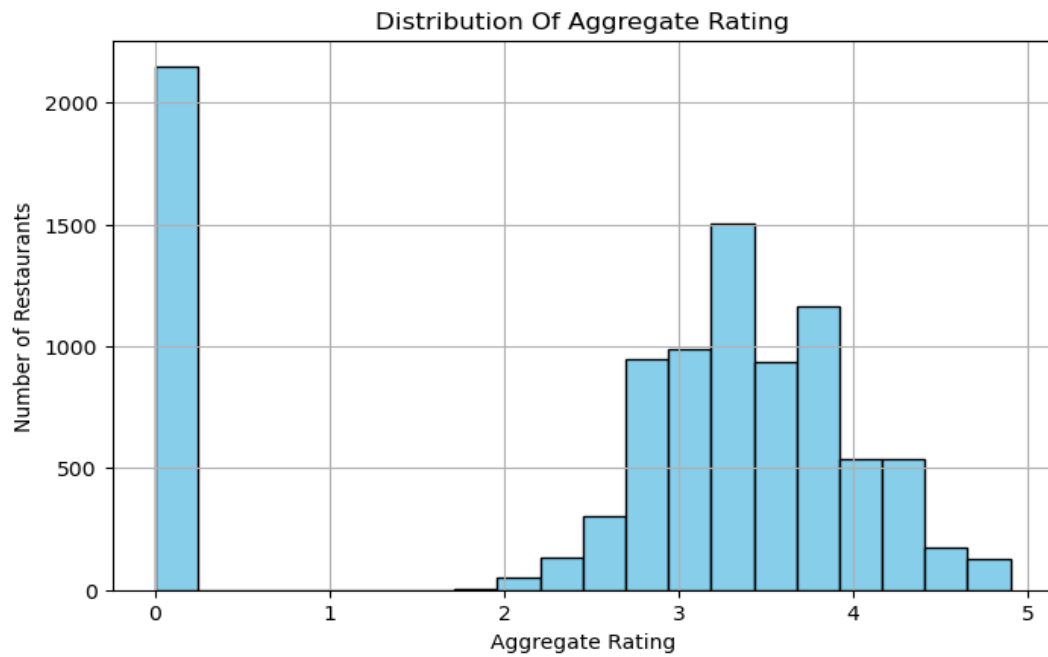

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

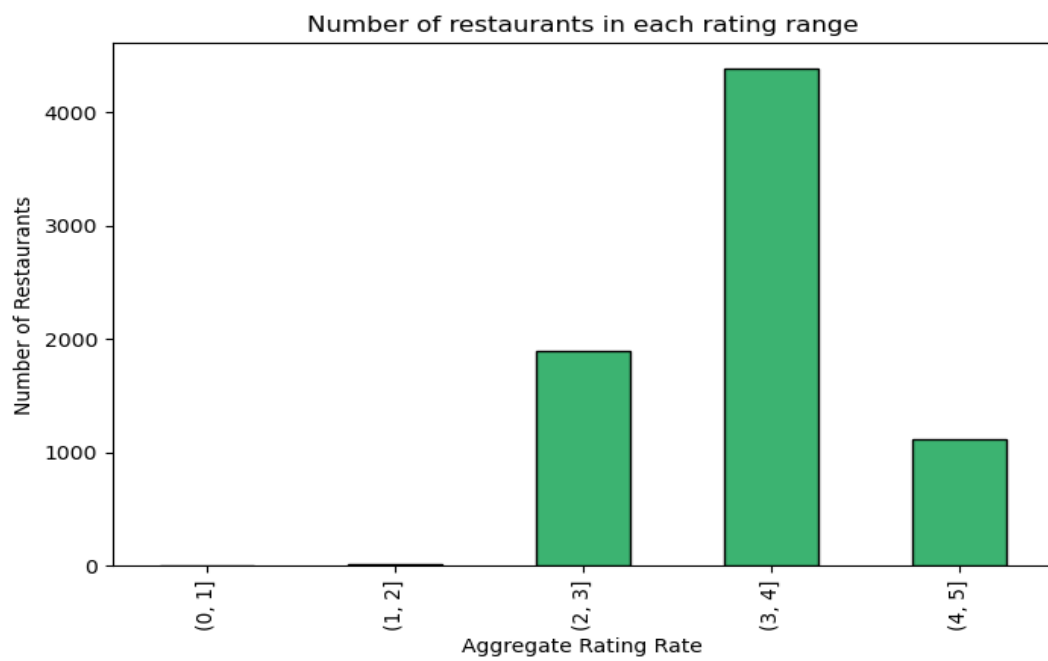

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

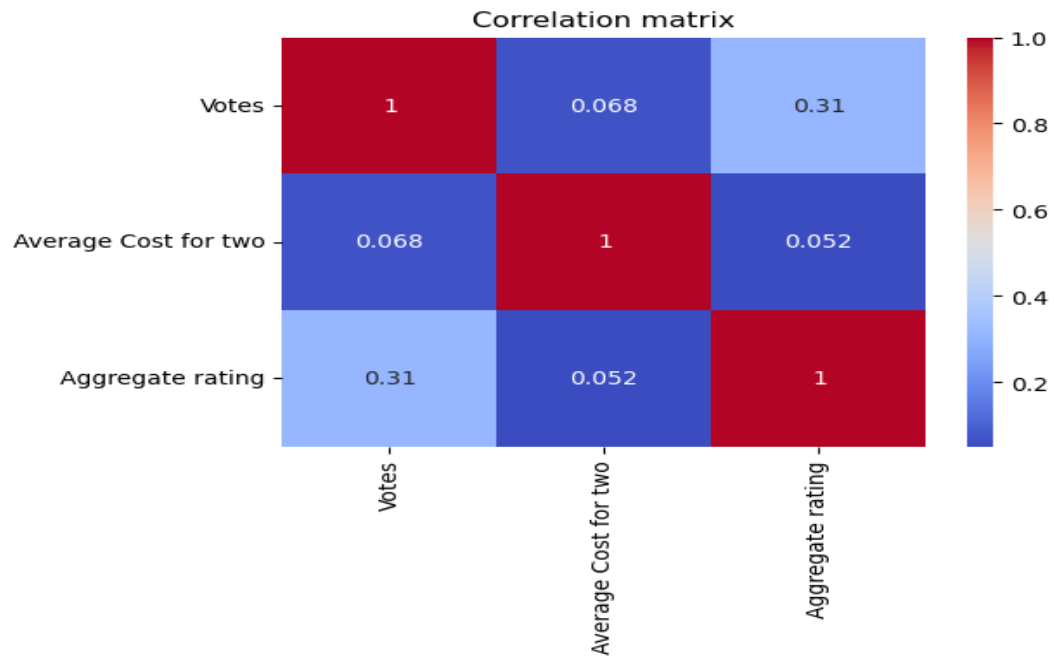

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

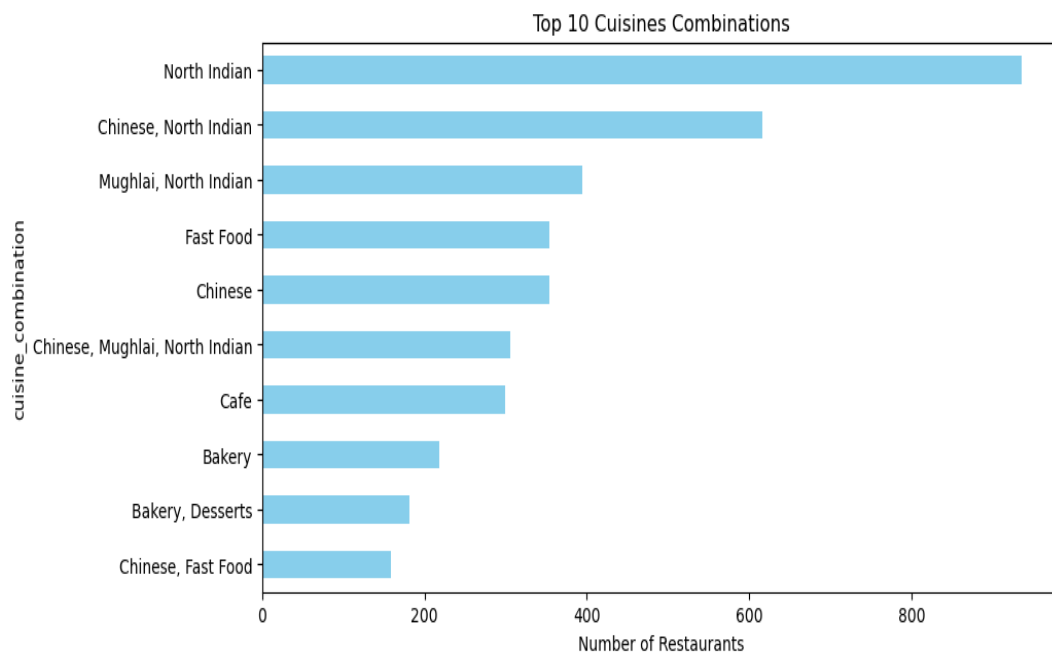

Conclusion: # Multivariate Analysis

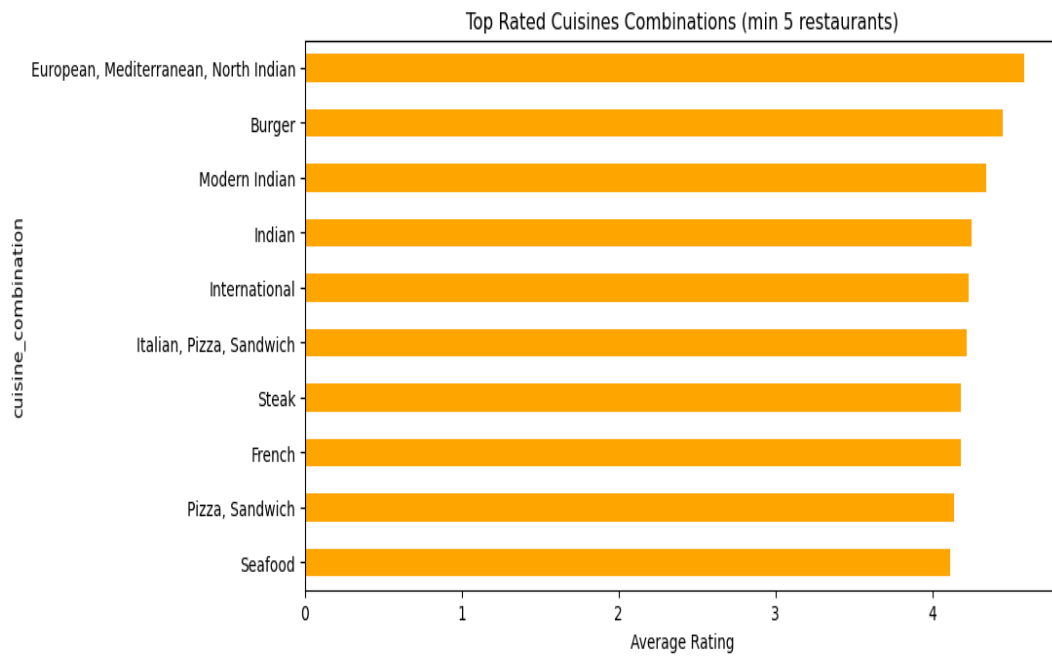

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.

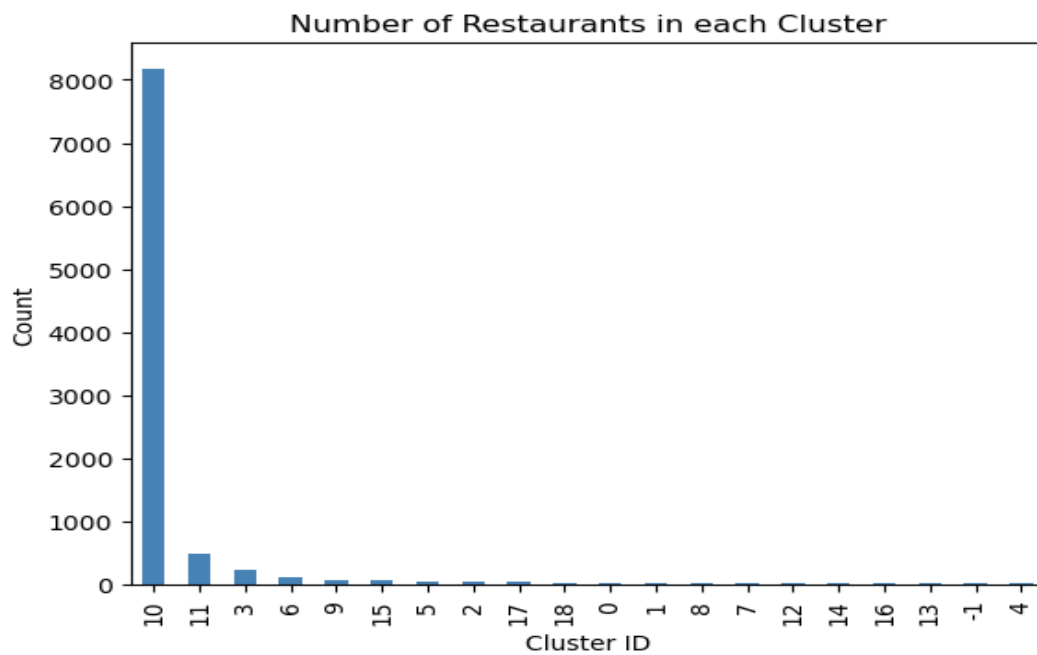

Conclusion: # Statistical Anlaysiais

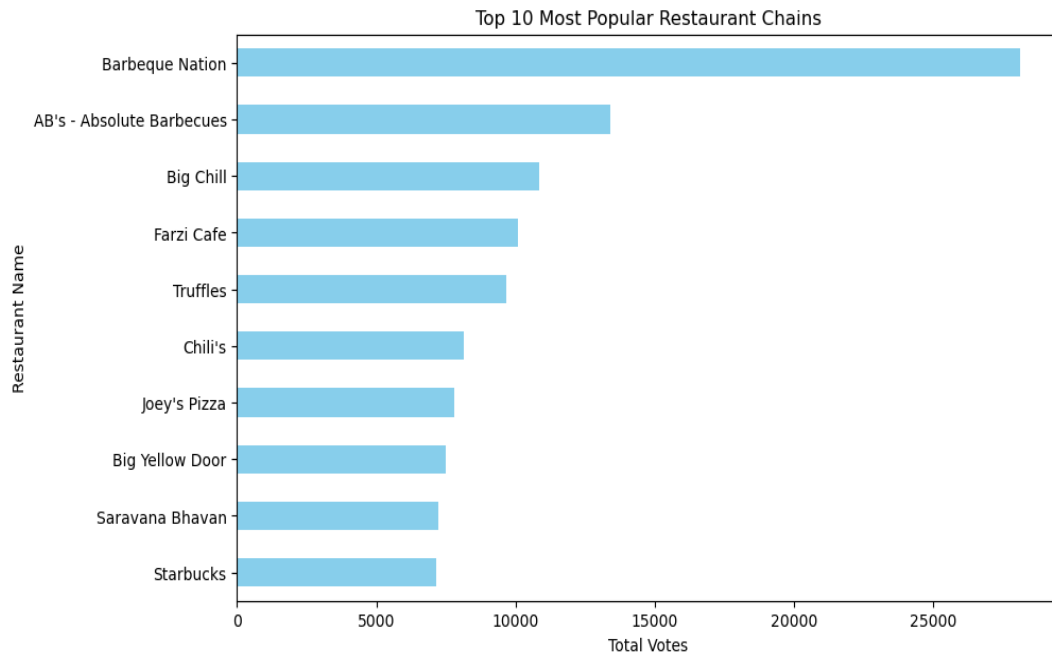

Conclusion: # Machine Learning Techniques

Conclusion: ## Preprocessing

Conclusion: # Classification (Predict Rating Category)

Conclusion: # Clustering (Customer Segmentation of Restaurants)

Conclusion: This visualization highlights key patterns or distributions relevant to restaurant data.
